Product Description

Takeuchi TL6R Track Loader

The TL6R features a radial lift loader design and meets all current emission standards. With a height of 6 ft 5.8 in and a width of just over 5 ft the dimensions of the TL6R allow it to excel on job sites that may have height and width restrictions. This track loader comes with a newly designed cabin with an overhead 5.7” color multi-informational display and backlit rocker switches that control a variety of machine functions. The TL6R comes standard with a quiet track design with flotation pads that reduces vibration, and noise levels, and improve ride quality.
